Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1888 edition. Excerpt: .great rarity among eastern collectors to find nests of this species in trees. But here the change has been decided. The migration was from marsh to upland, and the nest from basket to platform foundation. When the brush and weeds disappear, as they surely will, where then will the Blackbirds build? It has been my good fortune to find four nests of this bird (*Vireo noveboracensis*) in Chester County, where it is rather scarce. The first nest was found May 25th, 1887, and had just been completed. Returning a week later, I found it contained four eggs of the Vireo and one of the Cowbird. This nest was suspended from a limb of a small bush one foot from the ground, in a small clump of bushes in a swampy meadow. The nest is purse-shaped, as in fact all the four nests I found were, differing in that from those of the Red-eyed Vireo (*V. olivaceus*) which are cup-shaped. It was composed of bark, pieces of cocoon shavings, moss, etc., lined with fine strips of bark. Moss seems to be invariably used in the construction of their nests, while I have never seen any in a nest of the Redeyed Vireo. This set measure.67x.53;.74x.54;.73 x.56;.77x.56. Nest No. 2 was found May 29th, 1888, just finished, and was left until June 5th, when four eggs were taken from it. The bird was s and fully identified. ground, snspedhed from the limb of a small tree,...
