Forgotten Books, United States, 2016. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Meteorology During the twenty-seven years which have elapsed since the publication of Dr. H. N. Dickson s volume on Meteorology in the University Extension Series, the organised exploration of the atmosphere by means of kites and balloons, which began just about the time when the book was published, has placed at the disposal of meteorologists much observational material of an entirely new kind. The progress made on the theoretical side has been correspondingly rapid. In the following pages it has been my endeavour to present in simple form the main results which have been derived from the new method of observation and to fit them into their proper place in the scheme of dynamical meteorology. The observational side of the subject has been omitted. For descriptions of meteorological instruments and methods of using them, the reader should consult books of instruction in observing, such as the Observer s Handbook, prepared by the Meteorological Office. The climatological aspect has also been omitted. The reader may consider that some apology is due for the confusion of units used. In the present state of the subject any attempt to use only one system throughout would appear forced. I have therefore, as a rule, given the examples in the units in which I happened to find the data. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
