Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1874 Excerpt: .was a difficult matter to get them taken at any time, as they required men to be in readiness at any moment to make the observations, and competent assistants to see that the men did their duty. He had paid much attention to these points for many years: he had had the requisite staff in readiness; and he believed his observations were as accurate as it was possible to make them. Mr. Baldwin Latham, C.E., of London, says, In the case of Croydon, where the geological formation principally consists of gravel overlying chalk, the amount of rain contributed by a storm of 0.72 of an inch in twelve hours, in October, 1865, did not yield more than one-tenth of it to the sewers. The experience of Mr. Hawksley has been very great; and his formula for the dimensions of sewers is used by English engineers of...
