Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Field Book for Railroad Surveying This book, excepting Chapter II, is an outgrowth of the notes which have been prepared from time to time to supplement the text-books in railroad surveying used at Cornell. They were enlarged to somewhat their present shape some four or five years ago and used in mimeograph form as a text; the Transition Curve, with one or two additional tables, serving as the field book. Last year they were rewritten and printed, practically as now published, and combined with the Transition Curve into a field book, a limited edition of which was issued. The Transition Curve, thoroughly revised and somewhat enlarged, appears as Chapter II of the complete field book, which is now published for general use. And while an apology is due for adding to the large list of books on this subject already available, it is felt that a book more adapted to the needs of the student without neglecting the requirements of practice would meet a real need. With this in view an effort has been made to bring out practical field methods and to give representative problems, leaving much of the work and most of the special problems to the student. Also as far as practicable all matter not directly connected with railroad surveying has been excluded. This has resulted in a book of convenient size for the pocket, though containing everything necessary for field use. Long field computations requiring logarithms are unnecessary. For office computations, five-place logs are sufficient for all railroad field problems. Those by Gauss and by Hussey are the most convenient of any known to the authors.
